

CN-3600 SE

Contractor Series SmartSequencers

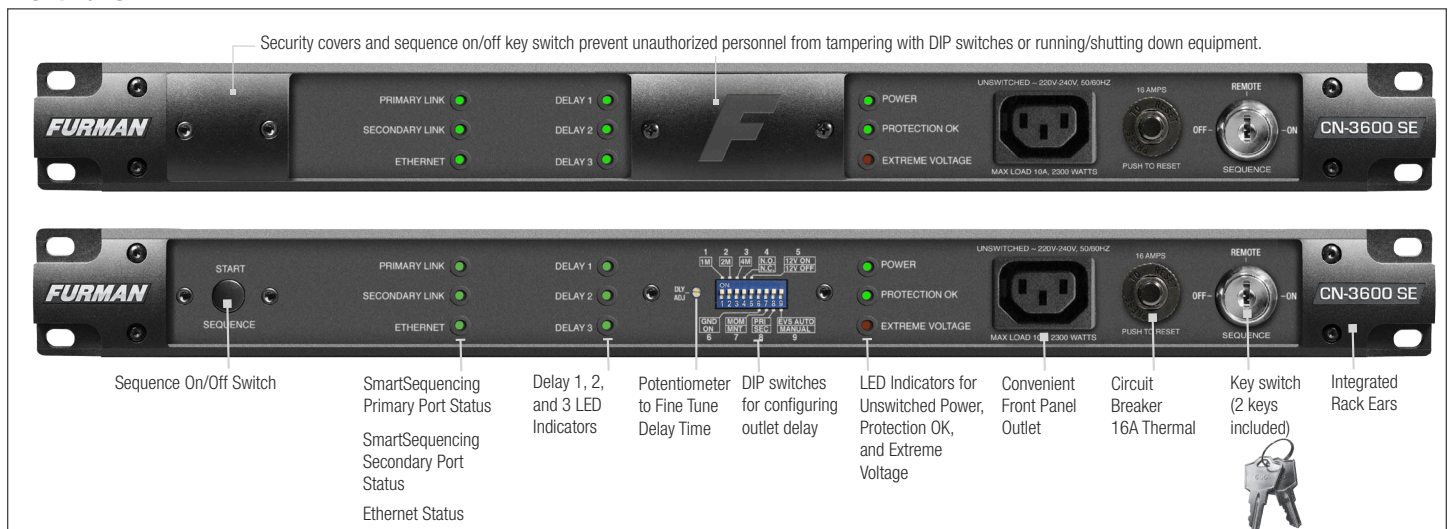

Furman's CN-3600 SE SmartSequencer™ combines protected AC power distribution and filtration with sequential system power on/off in a 1RU, 220-240VAC, rack-mount unit.

Features

- SmartSequencing technology allows large and complex Pro A/V systems to be safely powered on and off with a simple press of a button or turn of a key.
- Multiple units may be daisy chained at runs of over 300 meters with bi-directional communications between units for sequencing on and off large and/or complex systems.
- RS-232 compatibility provides command set integration with control systems. An optional RS-232-to-Ethernet adaptor for control, programming, & monitoring from any Web-enabled device via Telnet, direct HTTP connection, or Panamax/Furman's BlueBOLT® platform.
- Series Multi-Stage Protection (SMP) ensures zero downtime for mission-critical installations by safely absorbing, clamping and dissipating transient surges and spikes without damage to internal circuitry or connected equipment.
- Extreme Voltage Shutdown (EVS) safeguards from catastrophic under-voltage (under 175V sustained) or over-voltage (over 275V sustained) conditions. Unit can be set to automatic or manual recovery after an EVS condition has subsided.
- Linear Filtering Technology (LiFT) ensures maximum performance from connected equipment by reducing AC noise evenly across the audio & video bandwidth.
- Security covers and sequence on/off key switch prevent unauthorized personnel from tampering with DIP switches or running/shutting down equipment.
- Fire alarm shut off.
- 16 Amp total capacity.
- 15 Year Limited Product Warranty. See warranty policy documentation for terms and conditions.
