

TELEMETRY SYSTEM REM EXC - DIG

The OMB **TELEMETRY** system is a revolution in the field of telemetry and remote control of FM and TV transmitters in commercial broadcasting. The OMB **TELEMETRY** system allows managing, monitorizing and controlling all the parameters in the equipments by using the Simple Network Management Protocol (SNMP) and Webserver. The management is done at IP level, so all the equipments connected to a network accessible from the Internet can be controlled.

Versions:

REM EXC – For compact transmitters (EM 25, 100, 250, 500, 1K DIG PLUS).

REM DIG 1 – For 1 amplifier or control unit.

REM DIG 3 – For 2 amplifiers + 1 control unit.

REM DIG 4 – For 3 amplifiers + 1 control unit.

* A HUB will be needed to get the complete connection OMB can supply.
